DETAILED ACTION

Allowable Subject Matter

1. Claims 1-19, 27-45, 53, 55-73 are allowed. The following is an examiner's statement of reasons for allowance: The claims have been amended to include the use of a frequency domain data management model for dynamically determining a group of frequency domain pixel data to be retained. While Lee discloses that part of his new frame data comes from previous frames, and that data is in the frequency domain, he does not, as argued by the applicant, disclose a frequency domain data model as illustrated in figure 1 and discusses on pages 10 and 14 of the current specification. Said frequency domain data model claimed contains a shot change detector, a picture difficulty evaluator, a frequency classifier, a zero bytes generator and a frequency constrainer. This model in combination with the other elements of the claims was not found in a prior art search nor considered obvious by the examiner.

2.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
